Students' Feedback 同學感想

FAIZA

"The programme that I am studying in includes both the use of technology and the exploration of English studies. The combination of both fields sounded exciting to me. In my early days of the university life, I found some courses challenging. In spite of this, I took the initiative to seek help from course lecturers. With their kind assistance and through the learning of useful applications during classes, I have made a great leap of mastering various technological skills"
